Secrecy, National Security and the Vindication of Constitutional Law

Edited by **David Cole**, Georgetown University Law Center, US, **Federico Fabbrini**, Tilburg Law School, The Netherlands and **Arianna Vidaschi**, Bocconi University, Italy

'This book contains the broadest and deepest analysis of the legal and policy issues that relate to secrecy and national security on one hand, and the imperatives of a functioning democracy on the other. The broadest because it brings to bear materials from many countries, the deepest because it brilliantly explores a core problem of constitutional government.'

FORTHCOMING SERIES

Elgar Monographs in Constitutional and Administrative Law series

Series editors: **Rosalind Dixon**, University of New South Wales, Australia, **Susan Rose-Ackerman**, Yale University and **Mark Tushnet**, Harvard University, US

Constitutions are a country's most important legal document, laying the foundation not just for politics, but for all other areas of law. They allocate power among different levels and branches of government, record and promote a society's shared values, and protect the rights of citizens. Countries around the world are adopting written constitutions, though what defines a constitution is evolving to include a variety of sources beyond canonical texts, such as political conventions, statutes, judicial decisions and administrative law norms.

This cosmopolitan monograph series provides a forum for the best and most original scholarship in constitutional and administrative law, with each book offering an international, comparative, or multi-jurisdictional approach to this complex and fascinating field of research.

Political Technology and the Erosion of the Rule of Law

Normalizing the State of Exception

Günter Frankenberg, Goethe University, Germany

'Books abound on the question whether states of emergency can be legally controlled. But Frankenberg's account stands out because of his mastery of the political and legal contexts in which the terms of the debate about states of emergency were framed for us – the situation of Weimar and the constitutional reaction in postwar Germany. In addition, Frankenberg has an astonishing command of the history of political theory from Hobbes to the present. His innovative but scholarly analyses permit him to construct a narrative about the potential of the rule of law to respond to emergencies that includes detailed examinations of Schmitt, Foucault, Habermas, Agamben, and many others. His treatments of these figures seek to draw out the genuine insights they might offer, so that, even though none of the figures escapes the force of his criticism, his argument will challenge the assumptions of all involved in the debate.'

Announcing the new series
ELGAR ADVANCED INTRODUCTIONS

Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the Social Sciences and Law, expertly written by some of the world's leading scholars. Designed to be accessible yet rigorous, they offer concise and lucid surveys of the issues associated with discrete subject areas.

The aims of the series are two-fold; to pinpoint essential principles of a particular field, and to offer insights that stimulate critical thinking. By distilling the vast amount of information available on the subject area into a concise and meaningful form, the volumes serve as accessible introductions for undergraduate and graduate students coming to the subject for the first time. Importantly, they also develop well-informed, nuanced critiques of the field that will challenge and extend the understanding of advanced students, scholars and policy-makers.

Readership

Elgar Advanced Introductions will appeal to graduate students, advanced undergraduate students, policy-makers and non-specialist academics (though by crystallizing a field it is expected they will contribute to overall scholarly understanding).

Advanced Introduction to Comparative Constitutional Law

Mark Tushnet, Harvard University, US

Mark Tushnet, a world-renowned scholar of constitutional law, presents an introduction to comparative constitutional law through an analysis of topics at the cutting-edge of contemporary scholarship. His authoritative study investigates constitution making, including the problem of unconstitutional constitutional amendments; recent developments in forms of constitutional review, including 'the battle of the courts'; proportionality analysis and its alternatives; and the emergence of a new 'transparency' branch in constitutions around the world. Throughout, the book draws upon examples from a wide range of nations, demonstrating that the field of comparative constitutional law now truly encompasses the world.

A Short Introduction to the Common Law

Geoffrey Samuel, Kent Law School, UK and Sciences-Po, Paris, France

'Common law has remained enigmatic for lawyers from the civil law legal culture. This book presents a wonderfully compact introduction to the English common law and explains concisely why it is as it is today. Geoffrey Samuel offers insightful and scholarly first-rate representation of those characteristics which stand out for the civil law lawyer. Clarifying and supporting diagrams are especially helpful for non-common law lawyers. Samuel's A Short Introduction to the Common Law is highly recommended for anyone looking for clear and fluently written basic insight into the common law and its historical foundation.'

The Mind and Method of the Legal Academic

Jan M. Smits, Maastricht University, The Netherlands and University of Helsinki, Finland

'Jan Smits has long been one of the most interesting and original authors on European private law theory. Now he offers his views on legal scholarship, and they are as original as they are thought-provoking. His plea for a legal scholarship that maintains its identity vis-à-vis neighboring disciplines without collapsing into doctrinarism is bound to yield lively discussions – and hopefully will help re-establish a proper place for legal scholarship, in Europe and beyond.'

Studies in Comparative Law and Legal Culture series

In today's shrinking world it's important to extend our horizons and increase our knowledge of other people's laws. This series publishes in-depth volumes covering various aspects of private and public law in diverse legal traditions. Additionally, it seeks to encourage improved techniques and methods of comparative legal research, including the use of interdisciplinary studies. Individual volumes may deal with the law and culture not merely of well-known and frequently studied countries, but also with lesser-known, mixed, religious, and plural systems of the world. The focus ranges from important aspects of legal history, culture, and institutions to local experience and evolving legal trends.

Order from Transfer

Comparative Constitutional Design and Legal Culture

Edited by **Günter Frankenberg**, Goethe University, Germany

'Frankenberg's work gives a new insight of what comparative law can be in the context of globalization, representing an outstanding achievement. His theory of "transfer" supersedes the metaphors of mainstream scholarship, displaying that constitutions are not mere "commodities" or items to be assembled. The real matter is rather, which "meanings" are generated through transfer. In this way, beyond any usual flat version, we may perceive that any "constitutional relocation" exhibits a reappraisal of the whole world we live in.'

– Pier Giusseppe Monateri, University of Turin, Italy

'A fascinating collection of essays commenting on and developing Frankenberg's IKEA theory of legal transfer. . . essential reading for anyone thinking about the circulation of legal models especially, but not only, in the area of constitutional law.'

Corruption and Conflicts of Interest

A Comparative Law Approach

Edited by **Jean-Bernard Auby**, Sciences Po, **Emmanuel Breen**, Paris Sorbonne University and **Thomas Perroud**, Paris Est University and Sciences Po, France

As in all periods of swift economic development and political upheaval, our era of globalization has brought corruption and conflicts of interest into the spotlight. This comprehensive study highlights the difficulties of devising global legislative and judicial responses to these issues.

The papers gathered in this volume demonstrate how global regulations tend to meet strong cultural resistance, in particular when dealing with the more subtle patterns of conflicts of interest. It is a notion that is far from successfully regulated in every country or addressed in compatible ways. In fact, the comparisons offered demonstrate that even international organizations such as the European Union have failed to fully consolidate their systems for mitigating their own risks of corruption and conflicts of interest.
