## KEY TITLES

### Moving Towards Low Carbon Mobility **NEW**

Edited by **Moshe Givoni**, Tel-Aviv University, Israel and **David Banister**, Oxford University, UK

*'A unique assemblage of papers by top international experts that together cover every aspect of the transport-mobility-environment relationship – today's central issue for transport planners worldwide.'*

– Sir Peter Hall, University College London (UCL), UK

The transport sector has been singularly unsuccessful in becoming low carbon and less resource intensive. This book takes an innovative and holistic social, cultural and behavioural perspective, as well as covering the more conventional economic and technological dimensions, to provide a more complete understanding of the mobility and transport system and its progress towards high carbon mobility.

### A Handbook of Transport Economics

Edited by **André de Palma**, Ecole Normale Supérieure de Cachan, France, **Robin Lindsey**, University of British Columbia, Canada, **Emile Quinet**, Paris School of Economics, ENPC, France and **Roger Vickerman**, University of Kent, UK

*'This Handbook is a stellar compilation of up-to-date knowledge about the important topics in transport economics. Authors include the very best in the field, and they cover the most important topics for today's research and policy applications. Individual chapters contain sound, readable, well referenced explanations of each topic's history and current status. I cannot think of a better place to start for anyone wanting to become current in the field or in any of its parts.'*

– Kenneth Small, University of California-Irvine, US

### The Handbook of Airline Economics **NEW**

A Global Approach

Edited by **Darryl Jenkins**, The American Aviation Institute and Embry Riddle Aeronautical University Airline Simulation Laboratory, US

Comprising eight sections on topics from airport delays and connections to revenue and costs within the industry, this *Handbook* addresses the fundamental lessons and concepts of airline economics. The authors – leading scholars and practitioners – raise questions and analyze data surrounding issues facing the commercial aviation business. They also introduce concepts relating to global networks and discuss how global networks operate.

**Contributors include:** D. Abbey, T. Antolovic, E. Amel, T. Bacon, B. Balanza, J.N. Barrer, P. Belobaba, O. Betancor, B. Biffle, A. Cheng-Jui Lu, G. de Rus, J. Doniach, R. Eastman, I. Gershkoff, J. ## Classics in Port Policy and Management

Edited by **Mary R. Brooks**, Dalhousie University, Canada and **Athanasios A. Pallis**, University of the Aegean, Greece

*'Mary Brooks and Thanos Pallis have sculpted this voluminous and impressive tome from some of the best historical work on the topic of maritime transport. By so doing, they have provided researchers in the field with a highly useable and informative first port of call for any investigation of previous work.'*

– Kevin Cullinane, Edinburgh Napier University, UK

This path-breaking volume, edited by two leading scholars in the field, brings together 41 seminal contributions from 50 years of scholarly research in port policy and management. In revisiting the key foundations established by previous researchers, the reader will discover the knowledge necessary to examine these issues in new contexts and in conjunction with new port business models.

41 articles, dating from 1956 to 1999

**Contributors include:** A. Baird, J. Bird, M. Fair, H. Garnett, R. Goss, Y. Hayuth, B. Hoyle, P. Rimmer, P. Turnbull, G. Weigend

## Service Operations Management

TEXTBOOK

The Total Experience

**David W. Parker**, University of Queensland Business School, Australia

Comprehensive, accessible text for postgraduate and MBA students of service operations and undergraduates specialising in hospitality, tourism and the public sector.

*'This is an important book for educators, students and professional managers. As the services sector becomes a larger and increasingly pervasive part of our economy and as service operations management becomes the biggest part of most organizations, the opportunity to increase productivity, quality, flexibility and innovation of service provision must be grasped firmly by those who want their organizations to remain competitive and successful. This book very effectively blends conceptual frameworks with new, practical case studies. It is full of valuable and useful insights.'*

– Danny Samson, University of Melbourne, Australia

## The Dynamics of Corporate Co-evolution

NEW

A Case Study of Port Development in China

**John Child**, University of Birmingham, UK, **Kenneth K.-T. Tse**, The University of Hong Kong and **Suzana B. Rodrigues**, Erasmus University, The Netherlands

Offering insights of unusual richness, this book examines one of the world's most important business environments to determine the way that organizations can develop through interaction with their environments. It fills a gap in our understanding of the evolution of the Chinese business environment and throws light on the theory of co-evolution in order to inspire management practice.

Organisation and Strategy: Case Studies in their Context

## The Automotive Industry in an Era of Eco-Austerity

NEW PB

Creating an Industry as if the Planet Mattered

**Peter E. Wells**, Cardiff University, UK

*'A splendid analysis of how an automotive industry based on mass production has become an alien in our time – where diversity and personalised products and services have become the norm. Peter Wells presents an intriguing analysis of how the automotive industry can find ways forward and re-invent itself. A must read for all interested in sustainable mobility, as well as strategists in the automotive industry.'*

– Arnold Tukker, TNO Built Environment and Geosciences, The Netherlands

2010 224 pp Hardback 978 1 84844 967 1 £68.00  
2012 Paperback 978 1 84980 623 7 £25.00  
**Elgaronline** 978 1 84980 720 3

## Transport, the Environment and Security

Making the Connection

**Rae Zimmerman**, New York University, US

*'Transportation planning and policy making have followed a particular model for more than fifty years. Rae Zimmerman begins with the premise that we are in a rut and that the old ways of thinking need to be replaced. An enormous amount of evidence is presented that together argues a strong case for the systematic integration of planning for transportation, the environment, and security. While the book does not get us to an integrated process, it points us to one and starts us down a creative path. A great introduction to the complexities of these relationships.'*

– Martin Wachs, RAND Corporation, US

2012 288 pp Hardback 978 1 84980 020 4 £70.00  
**Elgaronline** 978 1 78100 526 2

## Urban Transport in the Developing World

NEW PB

A Handbook of Policy and Practice

Edited by **Harry T. Dimitriou**, University College London, UK and **Ralph Gakenheimer**, Massachusetts Institute of Technology, US

*'This edited collection is a rare treat for anyone with an interest in securing a sustainable transport future for the developing world. . . Such a book is most definitely both necessary and timely.'*

– Karen Lucas, *Journal of Transport Geography*

2011 656 pp Hardback 978 1 84720 205 5 £165.00  
2012 Paperback 978 0 85793 139 9 £45.00  
**Elgaronline** 978 1 84980 839 2

## Recent Developments in the Economics of Transport

NEW

Edited by **Roger Vickerman**, University of Kent, UK

*'This volume contains a set of readings which cover the main themes of efficiency, regulation, land use and regional development. This selection provides the concepts, theory, methodology and applications in some of the main fields of transport economics. The introduction to the collection gives an excellent overview of new developments as well as to the readings themselves. This book contains a selection of recent contributions and it shows the vitality of transport economics and the interplay between theory and empirical work. This is an excellent handbook for economic researchers and for postgraduate courses in transport economics.'*

– Ginés de Rus, University of Las Palmas de G.C. and University Carlos III de Madrid, Spain

59 articles, dating from 1990 to 2010

**Contributors include:** A. Anas, S. Anderson, K. Behrens, P. Buckley, M. Fosgerau, D. Levinson, C. Nash, J. Nilsson, T. Oum, A. Venables

## Regulating Transport in Europe

NEW

Edited by **Matthias Finger**, ÉPFL – École Polytechnique Fédérale Lausanne, Switzerland and **Torben Holvad**, University of Oxford, UK

This book concerns the regulation of transport within a European context, covering air, inland waterways, rail, road passenger and freight, urban public transport, and short sea shipping. All these sectors have experienced substantial changes over the last two decades, in terms of ownership, competition and liberalisation, and the book aims to explore the main transformations and their impacts. The authors address these issues, with a specific focus on the effects of the organisation and regulation of transport systems on their performance. They also provide timely policy recommendations, including possible European future policy initiatives.

July 2013 c 240 pp Hardback 978 1 78100 482 1 c £65.00  
**Elgaronline** 978 1 78100 483 8

**Classics in Transport and Environmental Valuation series**Series editor: **David A. Hensher**, University of Sydney, Australia

Transportation as a discipline has made substantial contributions to many fields of research endeavour. Four themes that are particularly pertinent are: the development of econometric and data tools to study the choices of individuals and firms; the quantification of health impacts of mobility options; the role of accessibility in urban planning; and the use of new technologies (such as GPS and remote sensing) to capture data efficiently and reliably. This series focuses on contributions that have been made to the literature in these four areas over the last 30 years, with a strong emphasis on both the theoretical and practical contributions under these themes.

**Urban Form and Transport Accessibility** **NEW**Edited by **Corinne Mulley**, University of Sydney, Australia

This important collection provides a foundational understanding of the debates surrounding urban form and the ability of land use policy to deliver the preferred urban form. Professor Mulley has selected key published articles from disciplines at the interface of urban economics and transport economics. These are grouped together within a number of themes, beginning with the contribution of central place theories developed in the early twentieth century and ending with contemporary papers providing answers to current issues of cities.

34 articles, dating from 1929 to 2011

**Contributors include:** W. Alonso, M. Fujita, C.D. Harris, H. Hotelling, P. Krugman, A. Lösch, P. Nijkamp, A.J. Venables**Series no. 3 Dec 2012 c 684 pp Hardback 978 0 85793 749 0 c £220.00****Transport, the Environment and Public Health: Classic Papers on Non-motorised Travel**Edited by **Stephen P. Greaves**, University of Sydney and **Jan Garrard**, Deakin University, Australia

This volume brings together a collection of seminal articles published in the past twelve years focused around non-motorised transport (NMT). The editors have selected papers, drawn from the transportation, health and planning literature, which cover various dimensions of NMT, including prevalence and correlates, health benefits and risks, forecasting and evaluation methods, and policy interventions to increase NMT. This interdisciplinary volume, including an original introduction, will be of value and interest to academics/students and practitioners from a variety of contexts and backgrounds with an interest in NMT.

28 articles, dating from 1999 to 2011

**Contributors include:** L.B. Andersen, D. Berrigan, R. Elvik, A. Forsyth, S. Handy, P. Jacobsen, T. Litman, D. Ogilvie, J. Pucher**Series no. 2 2012 408 pp Hardback 978 0 85793 862 6 £130.00****Choice Modelling: Foundational Contributions**Edited by **David A. Hensher** and **John M. Rose**, University of Sydney, Australia

Choice modelling is an area of growing popularity as many researchers and consultants seek to find better ways to explain the choices made by individuals, households and firms in many application contexts such as transportation, health services, environmental science, marketing, finance, economics, tourism, vacationing, education and employment. Choice modelling as a field began as long ago as 1927 but it was the research in the 1960s and 1970s that cemented the field as a dominant one for studying choice. This authoritative volume, along with an original introduction by the editors, brings together seminal papers that laid out the main features of the booming literature on discrete choice modelling. This timely collection will be of immense value to anyone with an interest in this evolving field of study.

44 articles, dating from 1927 to 2007

**Contributors include:** M. Ben-Akiva, A. Daly, W. Greene, R. Luce, D. McFadden, T. Morikawa, D. Revelle, L.L. Thurstone, K. Train, H.C.W.L. Williams**Series no. 1 2011 968 pp Hardback 978 0 85793 727 8 £315.00**Full contents – [www.e-elgar.com](http://www.e-elgar.com)**Accessibility Analysis and Transport Planning** **NEW**

Challenges for Europe and North America

Edited by **Karst T. Geurs**, University of Twente, The Netherlands, **Kevin J. Krizek**, University of Colorado, Boulder, US and **Aura Reggiani**, University of Bologna, Italy

The expert contributors present a wide variety of perspectives on transport and communication issues and explore their impacts on society at an international level. Best practice in both accessibility analysis and modelling are highlighted via widely interdisciplinary approaches. Moreover, future objectives and areas for research are clearly addressed.

## The Asian Mediterranean

Port Cities and Trading Networks in China, Japan and Southeast Asia, 13th–21st Century

François Gipouloux, Centre National de la Recherche Scientifique (CNRS), France

'François Gipouloux has written a vast and comprehensive history of the Asian economic system. In the tradition of Braudel, he paints a picture that is detailed, full of insight, and essentially very long term. On the basis of an analysis of the old Mediterranean and Hanseatic economic networks, he surveys the pre-modern Asian system, bringing it up to date with studies of Yokohama, Hong Kong, Singapore and other Asian hubs. The culmination of many years' work, Gipouloux throws light on a new China – a China no longer land based and inward looking but dependent on, and a power in, a maritime world.'

## International Handbook of Maritime Economics

Edited by Kevin Cullinane, Edinburgh Napier University, UK

'The International Handbook of Maritime Economics, expertly edited by Kevin Cullinane, is a very welcome addition to the maritime economics literature. Reflecting the widened scope of the International Association of Maritime Economics, it covers traditional maritime economics nicely complemented with port economics and management as well as hinterland transport. The book also balances shipping segments, geographical areas and management perspectives. The contributors clearly demonstrate their leading expertise when putting shipping into a trade, logistics and policy context. I sincerely recommend this book to anyone interested in contemporary shipping issues.'

– Johan Woxenius, University of Gothenburg, Sweden

## International Handbook of Maritime Business

Edited by Kevin Cullinane

'Maritime business has grown beyond its traditional areas of shipping and ports to its embedment in international supply chains and logistics systems. The collection of original papers found in this book, not only provide a wealth of information on traditional maritime business, but also on its growing role in supply chains and logistics systems. The papers are readable and of consistent quality and should attract academicians and practitioners who seek information about current practices in maritime business and their impacts.'
